CAREER OBJECTIVE

Detail-oriented .NET Developer with 1.5+ years of experience in building scalable enterprise solutions using ASP.NET Core, C#, and SQL Server. Skilled in ERP application development, Microsoft Graph API, EWS integrations, and ZATCA-compliant e-invoicing for Saudi clients. Passionate about writing clean, testable code, optimizing performance, and contributing to impactful projects in agile environments.

PROFESSIONAL EXPERIENCE

Infogate Technologies – Tirur, India

Software Engineer | June 2025 – Present

- Designed and customized ERP applications for clients in retail, trading, and finance domains.
- Designed and customized ERP applications for clients in retail, trading, and finance domains.
- Developed Windows Forms and ASP.NET MVC modules with modular and scalable architecture.
- Implemented ZATCA-compliant e-invoicing (Phase 1 & 2) with QR code generation, XML, and reporting.
- Worked on SQL Server (SSMS) for database design, stored procedures, and performance optimization.
- Integrated Crystal Reports for tax invoices, financial analytics, and business reports.
- Led requirement gathering, ERP customizations (field visibility, permissions, reporting), and deployment support.

ClaySys Technologies – Kochi, India

Software Engineer L2 | March 2025 – June 2025

- Architecting and developing scalable, maintainable RESTful APIs using **ASP.NET Core** for enterprise applications.
- Enhancing productivity tools through seamless integration with **Microsoft Graph API** and **EWS**, supporting calendar sync, meeting scheduling, and legacy mailbox operations.
- Gaining practical experience in **Vue.js**, contributing to the development of modular and responsive UI components.
- Managing application deployments on **IIS** with performance tuning, logging, and environment-specific configurations.

Software Engineer L1 | *January 2023 – February 2025*

- Designed and deployed RESTful APIs using ASP.NET Core, integrating Microsoft Graph API and EWS for automated calendar and mailbox features.
- Contributed to SOAP-based integrations with SymXchange (banking API) using XML and WSDL for financial operations and member account handling.
- Assisted in developing and maintaining front-end components using **Vue.js**, focusing on responsive and modular UI design.
- Implemented caching strategies and query optimizations to enhance API performance.
- Wrote unit tests with xUnit/NUnit and participated in full-cycle deployments on IIS across staging and production environments.
- Supported agile team deliveries by collaborating closely with QA, designers, and client stakeholders.

TECHNICAL SKILLS

- **Languages:** C#, Python
- **Frameworks:** ASP.NET Core, ASP.NET MVC, Web API
- **APIs & Services:** REST, SOAP, Microsoft Graph API, EWS, SymXchange
- **Web:** HTML, CSS, JavaScript, Bootstrap
- **Databases:** SQL Server, MySQL
- **Tools:** Git, Visual Studio, IIS
- **Testing:** xUnit, NUnit

PROJECTS

Smart Resume Selector | *Jan 2023 – May 2023*

- Built a resume screening system using Naive Bayes & NLP to rank resumes based on job-fit and test results.
- Enabled streamlined applicant tracking for recruiters and candidates.
- *Tech Stack:* Python, Django, MySQL

Students Discussion Forum | *Aug 2022 – Dec 2022*

- Designed and developed an online discussion platform for students to post, reply, and collaborate on academic topics.
 - *Tech Stack:* Python, Django, MySQL
-

EDUCATION

Master of Computer Applications (MCA)

APJ Abdul Kalam Technological University – MES College of Engineering, Kuttipuram
Aug 2021 – Jun 2023 | CGPA: 7.8/10

Bachelor of Computer Applications (BCA)

University of Calicut – Grace Valley Arts & Science College
Jun 2018 – Apr 2021 | CGPA: 7.0/10

CERTIFICATIONS

- *Introduction to Operating Systems* – NPTEL (IIT Kharagpur)
- *Data Mining* – NPTEL (IIT Kharagpur)
